

Commvault® Cloud Platinum Resilience

The most advanced and complete cyber resilience offering with cloud-like simplicity.

OVERVIEW

Platinum Resilience provides customers with a secure, dedicated cloud instance of Commvault Cloud – from foundational backup and recovery to advanced AI-driven automation and cyber deception to white glove services to help keep your organization cyber resilient. With 24/7 security specialists available, Commvault helps prepare you for threats.

CHALLENGE

Enterprise companies today face the stark choice of spending large amounts of money and hiring security experts to safeguard their data or greater risk of an attack. Even if you outsource these services, there is no guarantee they have the resources to bring you back online quickly in the event of an incident. Every day, a business is down due to a cyber attack – it can cost hundreds of thousands in revenue. How can organizations stay ahead of criminals, keep up with the latest security best practices, & maintain cyber resilience?

SOLUTION

Commvault Cloud Platinum Resilience combines the world's most advanced and complete cyber resilience offering with cloud-like simplicity. Platinum Resilience builds on Commvault Cyber Resilience, which includes Autonomous Recovery and Foundational Protection, bringing advanced AI-driven automation and cyber deception.

Commvault provides a single-tenancy isolated, and perpetually monitored cloud control plane. It brings security, cyber recovery, and data security protection expertise for recovery testing and readiness checks, advanced reporting, security audits, and custom telemetry. Plus, Platinum Resilience customers' support includes ransomware readiness consultation and cyber recovery experts to ensure a reliable, predictable, and speedy recovery. We include the Commvault Ransomware Recovery Protection Plan to help you, your executives, and your Board have greater assurance that you can recover from a ransomware attack.

SECURED BY DESIGN

Customers leverage a single-tenant air-gapped control plane. This means your data is isolated and protected from potential threats, providing an extra layer of security for your critical information. Managed by Commvault experts, our team will handle the management and maintenance of your cyber resilience infrastructure, allowing you to focus on your core business activities.

SIMPLICITY AND FLEXIBILITY

Resilience starts with well-architected infrastructure already deployed and ready to use, eliminating the need for heavy building or outsourcing of architecture. However, we understand that every environment is unique. Our Commvault architectural guidance and services can help you create a highly scalable and resilient infrastructure that is easily adapted to meet the needs of your individual hybrid and multi-cloud environment.

CLOUD MIGRATION SERVICES

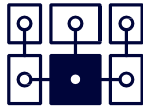

Are you looking to migrate your existing control plane to the cloud? Commvault has got you covered. Our platform enables seamless migration, ensuring a smooth transition to the cloud while maintaining the security and integrity of your data.

ADVANCED REPORTING

Access to advanced reporting, security audits, and custom telemetry. Our platform provides detailed insights into your data protection activities, allowing you to monitor and optimize your cyber resilience strategy.

you need it

CYBER RESILIENCE ASSESSMENT & TESTING

To help ensure ongoing protection, our Platinum Resilience solution offers an annual cyber resilience assessment and testing. Our experts will evaluate your data protection strategy, identify potential vulnerabilities, and help you stay one step ahead of cyber threats.

INCIDENT RESPONSE SERVICES

In the event of a ransomware attack, time is of the essence. With our 24/7 Ransomware Recovery Response team, our experts will assist you in recovering your data and getting your business back on track as quickly as possible.

COMMVAULT RANSOMWARE RECOVERY PROTECTION PLAN

Providing you peace of mind, we offer the Commvault Ransomware Recovery Protection Plan. We stand behind our solutions and help ensure the recoverability of your data, providing you with the confidence that your information is safe and secure.

SAFEGUARD YOUR DATA ACROSS WORKLOADS, PLATFORMS, AND LOCATIONS

Platinum Resilience delivers proactive cyber resilience that helps secure and recover data broadly across cloud, on-prem, and SaaS workloads. With hardened security, proactive insights, end-to-end observability, and rapid recoverability built-in, Commvault Cloud minimizes data threats while delivering unrivaled business continuity and SLA compliance – in the face of threats.

Capability	Features and Benefits
Premium Managed Services and Expertise	<ul style="list-style-type: none"> • Single tenant air-gapped control plane • Commvault remote managed platform services • Migration of existing control plane to cloud • Advanced reporting, security audits, and custom telemetry • Deep archiving & data migration assistance • Ransomware Readiness architecture & design assessment • Annual Cyber Resilience assessment & testing • 24/7 Ransomware Recovery Response team • Commvault Ransomware Recovery Protection Plan
Early Warning	<ul style="list-style-type: none"> • AI-drive threat prediction & threat scanning • Active defense against threats • Cyber deception and decoys protect critical assets • Integrates across production and backup environments
Risk Governance	<ul style="list-style-type: none"> • Protect and analyze anomalous data in backups • Easily locate and quarantine malware/infected files • Surface detected threats and take corrective actions. • Automatic data identification and classification assignment to secure and defend sensitive data, including PII • Manage permission inconsistencies and overexposed files to reduce data exfiltration risks and meet compliance • Identify, assess, and mitigate risks across your entire data landscape • Lock down data and harden against changes • Built-in anomaly detection and reporting • Test failover of workloads into isolated networks for iterative “clean-room” testing and investigation
Foundational Platform Protection	<ul style="list-style-type: none"> • Zero-Trust Architecture at every layer • End-to-end data encryption, including data at rest and in transit • Immutable Storage options • Unified Management for workloads in the cloud, at the edge, and on-premises • Security Posture Monitoring & Alerting

SAFEGUARD YOUR DATA ACROSS WORKLOADS, PLATFORMS, AND LOCATIONS

Capability	Features and Benefits
Recovery Automation	<ul style="list-style-type: none"> • Recovery orchestration for VMs • Recovery orchestration for physical to virtual • Recovery of VMs, Files, and Application items from replicas
Simplified User Experience	<ul style="list-style-type: none"> • 3-step replication configuration • 1-click Failover, Failback, and Recovery • Intuitive, web-based user interface allows you to control your entire environment from a single dashboard • Role-based access control for self-service functions, freeing up your admins and IT support staff to focus on higher-value activities
Cyber Recovery Readiness	<ul style="list-style-type: none"> • Improve recovery initiatives with automated workflows • Reduce the risk of reinfection during restore operations • Cyber Recovery & Disaster Recovery dashboard and reporting • Automatic validation of replicas • Validation of Applications for Disaster Recovery VMs • Validation of Applications and Files for Disaster Recovery • File anomaly dashboard enhances platform resiliency to threats
Recovery Automation	<ul style="list-style-type: none"> • Recovery orchestration for VMs • Recovery orchestration for physical to virtual • Recovery of VMs, Files, and Application items from replicas
