

Backup & Recovery for Microsoft Azure Databases

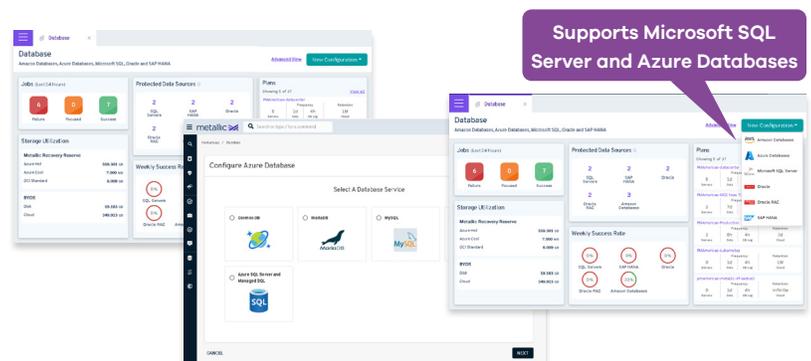

Microsoft Azure Database Protection

Commvault® provides a unified solution to fully protect your Azure databases. The Commvault Cloud SaaS platform reduces costs and complexity through operational simplicity—infinite scale as your business adds more resources and applications.

In addition to protecting Microsoft SQL Server, Metallic Backup now delivers everything you need to protect Azure Database workloads including Azure SQL Server, Azure MySQL, Azure Maria DB, Azure PostgreSQL, and Azure Cosmos DB.

PROTECTING AZURE DATABASES WITH COMMVAULT

- Support for the broadest selection of Azure Database services
- Enhance native tools with purpose-built backup for extended retention and granular controls
- Simplify management with a single solution for Azure alongside your hybrid cloud data estate

Ensure business continuity and compliance

Get enterprise-ready cyber resilience for your Azure infrastructure with global backup policies for data flexibility across Azure regions, accounts, and storage tiers.

Complete Coverage only from Commvault

Reliably backup the broadest selection of Azure databases from one solution and defend against today's—and tomorrow's—threats. Achieve shorter backup times, reduce operational costs with unparalleled flexibility from a single pane of glass, and do it all across other multi- and hybrid cloud workloads.

Built for Azure, delivered "as-a-Service"

Designed for infinite scale, security, and flexibility, Commvault Cloud brings SaaS simplicity to data security for Azure databases.

Unified management

Consolidate all your backups with Commvault Cloud to reduce tool sprawl and data silos. Effectively protect, move and manage hybrid-cloud and multi-cloud data from a single pane of glass.

Optimized Azure costs

Reduce costs for storage and multi-region copies with Commvault Cloud deduplication and compression capabilities.

SUPPORTED PLATFORMS AND APPLICATIONS

Databases

<p>Supported Azure Databases</p>	<ul style="list-style-type: none"> • Azure SQL Server • Azure MySQL • Azure MariaDB • Azure PostgreSQL • Azure Cosmos DB
<p>Storage Targets</p>	<ul style="list-style-type: none"> • Primary: Commvault Cloud Air Gap Protect on Azure (Hot), Secondary: Commvault Cloud Air Gap Protect on Azure (Cool) • Primary: BYOS (Azure only), Secondary: BYOS (Azure only), Commvault Cloud Air Gap Protect on Azure (Hot), Commvault Cloud Air Gap Protect on Azure (Cool)

Backup & Recovery for Azure Databases is included in the Commvault database subscription. Commvault Cloud provides protection beyond Microsoft SQL Server and Azure databases with Azure VM, Azure Kubernetes, Azure Blob and Azure Files, all from a single vendor. Per VM and TB charges apply.
