

Commvault® Cloud with Premium Microsoft 365 Backup Storage

Safeguarding data is always your responsibility. So, when it comes to invaluable data living in your Microsoft 365 environment, you need leaders you can trust.

Commvault® and Microsoft share a 27+ year partnership to co-engineer next generation cyber resilience solutions. Together, we deliver joint innovations for the comprehensive protection of crucial business data in Exchange, OneDrive, SharePoint, Teams, and more. The result? Capabilities that help keep your data safe, compliant, and recoverable from deletion, corruption, and malicious attacks. With Commvault and Microsoft, you can have confidence in your business continuity, regardless of your organization's size.

Commvault Cloud with Premium Microsoft 365 Backup Storage delivers high-velocity recovery point-based restore capabilities into Commvault Cloud® Backup & Recovery for Microsoft 365. This provides the option to leverage high-speed backup and accelerated recovery capabilities for key Microsoft 365 Exchange, SharePoint, and OneDrive workloads, all managed within the Commvault Cloud console. Get the ultimate backup and recovery performance, along with the unique benefits of Commvault Cloud in one platform for comprehensive, unified protection of Microsoft 365 and other environments.

Optimized Performance with Commvault Cloud Backup & Recovery for Microsoft 365

Keep all your Microsoft 365 data safe, compliant, and recoverable with Commvault Cloud Microsoft 365 protection capabilities, including coverage of Teams data. Commvault provides configurable extended retention to meet regulatory requirements, air-gapped backups for last line of defense protection against ransomware, and flexible, granular recovery with item-level and self-service restore options.

Rapid Recovery at Scale

Safeguard business continuity with high-speed bulk restores and rapid recovery of Microsoft 365 Exchange, SharePoint, and OneDrive data using Microsoft 365 Backup Storage.

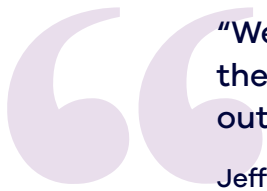

Centralized Management

Secure and recover Microsoft 365 data alongside other SaaS, hybrid, and multi-cloud workloads from a single pane of glass.

Unified Data Resilience for Microsoft 365

Experience industry-leading cyber resilience of Commvault Cloud, combined with the high-speed bulk restores of Microsoft 365 Backup Storage, for comprehensive Microsoft 365 data security and protection.

“We are pleased to work with Commvault and eager to have customers use their enhanced solutions built on our Microsoft 365 Backup Storage to provide outstanding backup experiences for business stability and confidence.”

Jeff Teper
President, Collaboration Apps and Platforms, Microsoft

DEDICATED PROTECTION FOR MICROSOFT 365, FROM COMMVAULT

COMMVAULT® CLOUD, POWERED BY METALLIC® AI

Award-winning, enterprise-grade data protection

Comprehensive coverage across Teams, Exchange, OneDrive, SharePoint, and more.

Source-side data isolation, for air gapped protection from malicious insiders and ransomware attacks.

Granular recovery with flexible point-in-time, in/out-of-place, and item-level restore options.

Up to 10-year retention of active and deleted datasets with bundled Azure storage options for compliance needs.

Simple cloud delivery, built on the durability and scale of Microsoft Azure.

Single-solution protection for standardized data protection and compliance across Microsoft and non-Microsoft workloads.

MICROSOFT 365 BACKUP STORAGE

Native, high-speed backup and recovery on Azure with no throttling.

Massive scale restores on Azure.
