

COMMVault  | HCLTech

Trusted Partners Unleash the Hidden Value of Data

Commvault and HCLTech come together for integrated data protection and security

Combining our technical synergies, Commvault and HCLTech bring to life vision for modernized data protection and security. HCLTech Velocity, Infonomics, and ElasticOps offerings are the foundation to create intelligent information management that offers data protection-as-a-service.

CUSTOMER CHALLENGES IN THE DIGITAL WORLD ARE MORE DAUNTING THAN EVER

In the age of digitalization, organizations face the challenge of managing unprecedented data growth in terms of volume and variety. Unlocking data value depends upon how effectively organizations adopt smart data management practices, but many things can hold them back, such as:

Rising cybersecurity & ransomware threats

Outdated technology & data practices

Exponential data growth & dark data

Compliance with stringent, changing regulations

Rising IT complexity and cost

MODERNIZE DATA MANAGEMENT AND PROTECTION

Commvault and HCLTech work together to create modernized data management and protection with HCLTech’s Infonomics serving as the foundation. Together, we provide a modern data solution to reduce cost, enable flexible consumption, improve cyber resiliency, and meet compliance standards. See below for the value brought by an integrated information management approach that offers data protection-as-a-service.

Analytics, security and automation

Resource optimization

Cloud integration

Flexible consumption

- Multi-Cloud and Cloud Native
- Disaster Recovery
- Data Analytics and Insights
- Data Security and Ransomware Protection
- DevOps Automation
- Containerization and Kubernetes

FOCUSED ON CUSTOMERS' BUSINESS BENEFITS JOINT HCLTECH AND COMMVAULT SOLUTIONS:

Reduce costs

Use a single, unified data management solution for workloads across the data estate. Eliminate multiple tools and software.

Ensure Compliance

Leverage end-to-end visibility, automated policy-based enforcement, and built-in reporting.

Modernize and Scale

Reduce TCO, data center footprint, and enable flexible consumption options for cost control and on-demand scalability.

Protect the Journey

Accelerate cloud migration and application modernization efforts with protection from potential ransomware attacks. Ensures a seamless transformation journey from legacy to cloud-native environments.

VERSATILITY IN HELPING A DIVERSE SET OF CUSTOMERS AND USE CASES

✓ Large oil and gas company

Standardized on hybrid cloud architecture

- 52% reduction in recurring software costs
- 42% reduction in associated hardware costs
- 55% reduction in downtime

✓ Large chemical and minerals manufacturer

Backup consolidation and transformation

- Single solution for private and public cloud backup
- Improved ransomware protection
- Enhanced protection for endpoints and SaaS apps

✓ Multi-national beverage company

Backup consolidation for on-premises and multi-cloud

- Unified backups for private and public cloud
- Reduced average backup window
- Minimized downtime and speed of recovery

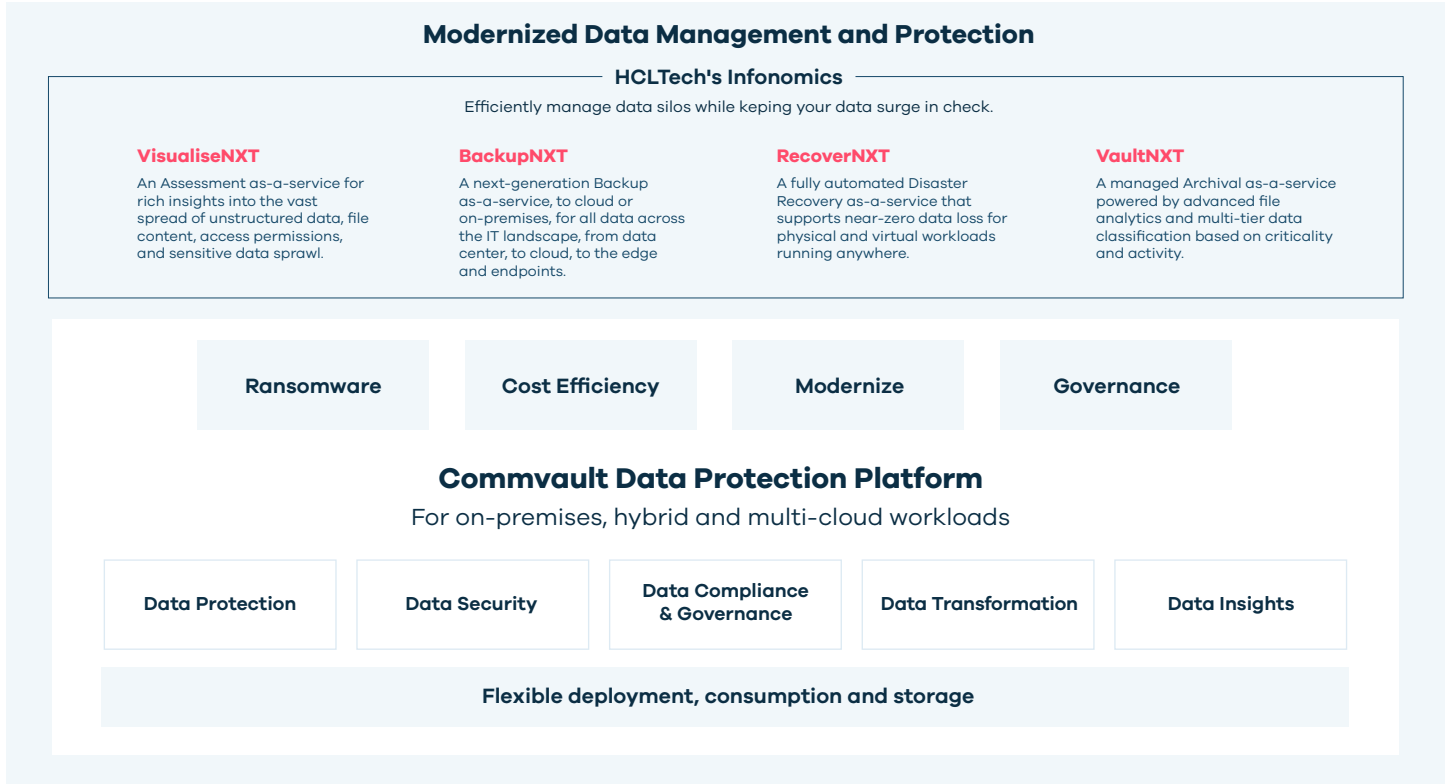

✓ Large recruiting services organization

Backup transformation and consolidation with hybrid cloud

- Ensured higher availability and improved security
- Minimized cost with automatic backups
- Up to 50% improved RPO and 8x faster RTO

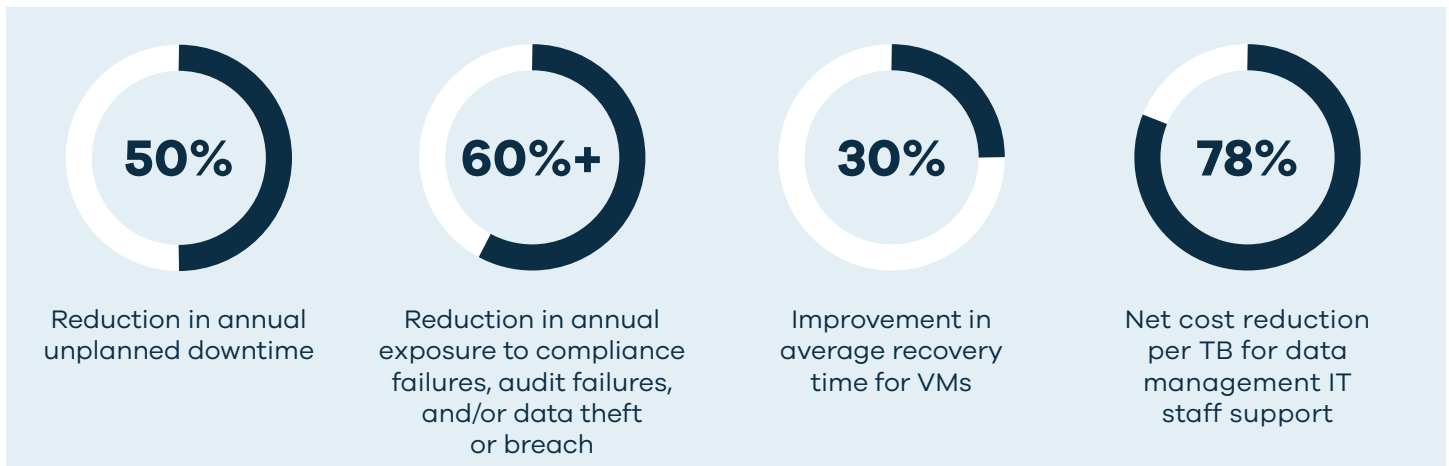

BETTER TOGETHER

Combining our unique capabilities, we’ve built a comprehensive and unified modernization strategy with compelling benefits:

THE COMMVAULT ADVANTAGE

Customers across industries have realized more efficient data protection operations and reduced costs using Commvault’s data protection services¹.

¹ "Quantifying the business value of Commvault software," WW Customer Analysis Survey, IDC, Oct 2021

PROVIDING DATA PROTECTION AND RESILIENCY TO BUSINESSES TOGETHER SINCE 2015

	<p>Manage 40+ PB of data (pre-dedup) using Commvault</p>	<p>750+ experts trained on Commvault globally</p>	<p>A Commvault Global Reseller and Managed Service Provider</p>	<p>Joint investments in labs and POCs</p>	<p>Flexible subscription and utility (U4X) consumption models</p>
 <p>COMMVAULT</p>	<p>Full spectrum of capabilities to support their hybrid and multi-cloud journeys</p>	<p>Unified platform to unlock data value</p>	<p>25+ years of innovation and reputation in the enterprise</p>	<p>Rich features with security, scalability, and built-in automation</p>	<p>Broad ecosystem and technology integrations support existing IT investments</p>
