## Why Backup Data on Microsoft 365?

Secure sensitive data in education

Microsoft 365 Cloud Services offer a variety of applications critical to students and faculty. As data is shared, which is a critical function in education institutions, it becomes a target for sophisticated cyber attacks. While Microsoft offers native security capabilities and availability, your data is still at risk without third-party data backup. Organizations are ultimately responsible for the security of their data which is why it's crucial to deploy third-party services that integrate, scale, and protect your most valuable asset – your data.
