

Secure Your Data: Defend Against Ransomware

Simplify data security with the power of Commvault and Microsoft Azure

A multi-layered approach to ransomware protection and recovery

Commvault secures your data using intelligent data protection, with AI-driven monitoring capabilities that defend against cyberthreats. Following the National Institute of Standards and Technology's Cybersecurity Framework, this multi-layered approach combined with the use of Azure provides air-gapped data protection and immutable backups.

Improve responsiveness to emerging threats with Metallic

By combining security layers within Azure and the layered approach of Commvault, you gain the best ransomware protection available. Metallic, Commvault's SaaS solution, streamlines multi-layered protection keeping your data secure, compliant, and rapidly recoverable from today's threats with the simplicity of SaaS. This is complemented with Metallic Security IQ to spot evolving threats with advanced security tools and insights.

Commvault and Azure together

Commvault is the recognized leader in data management. Microsoft leverages Commvault to manage and protect some of its most important data including data in Azure, Office 365 and Xbox Live. The Microsoft and Commvault partnership spans 20+ years of co-designing, co-engineering and delivering industry-leading data solutions.

How secure is your data? [Take the Commvault Ransomware Risk Assessment](#)

Zero Trust Data Protection from Commvault & Metallic:

-  **IDENTIFY:** Assess and mitigate risk
-  **PROTECT:** Lock data from any changes
-  **MONITOR:** Identify anomalous threats
-  **RESPOND:** Perform orchestrated actions
-  **RECOVER:** Restore clean data quickly

“Emirates Steel’s digitalization efforts include moving its SAP sales, manufacturing, finance and CRM modules to the cloud. Commvault gives us confidence that we can recover rapidly from any scenario, including potential ransomware attacks.”

Mohammed Azam
 IT Infrastructure Head | Emirates Steel
